FUNNEL BLUEPRINT #1

The Reel-to-Sale Funnel

The fastest path from cold stranger to paying customer. Use short-form AI actor content to interrupt, qualify, and convert — all without a single sales call. Best for digital products priced $27–$197.

VIDEO #1

Hook Reel (15s)

Pattern interrupt. Pain point. One bold claim. No CTA — just leave them wanting more.

VIDEO #2

Bridge Video (90s)

Story + mechanism reveal. Who you are, how it works, why now. Ends with a direct CTA to the sales page.

VIDEO #3

VSL (8–12min)

Full-length AI actor VSL. Proof stack, offer reveal, objection crush, close. Lives on the sales page.

VIDEO #4

OTO Video (3min)

Post-purchase upsell. Same actor, higher-ticket offer. Starts mid-sentence — "Wait — before you go..."

2–5%	15–25%	$0.80	3.2x
Cold Traffic CVR	OTO Take Rate	Target CPC (FB)	Avg ROAS (Launch)

DEPLOYMENT SEQUENCE — DO THIS IN ORDER

1. **Build the VSL first.** Everything else serves the sales page. Write your offer and price before you shoot a single hook.
2. **Create the hook reel using Synthesys Actors.** Extract the most painful line from your VSL script and make it the hook reel's first sentence. Same actor. Same energy.
3. **Build the bridge video.** 90 seconds. Story + mechanism + CTA. Use the same AI actor so the viewer sees a consistent "face" across every touchpoint.

4. **Set the ad campaign to send to the bridge video first** for warm traffic, and direct to the VSL for retargeted traffic (they've already seen the hook).
5. **Record the OTO video last.** Use your top 1–2 objections from checkout abandonment data. Address them in the first 10 seconds of the OTO video.

FUNNEL BLUEPRINT #2

The Video Webinar Funnel

The highest-converting funnel for anything priced $497 and above. AI actor videos do the qualifying — by the time someone registers, they're already half-sold. Best for coaching, courses, and agency services.

VIDEO #1

Curiosity Ad (30s)

Raises a question they can't answer. Promises the answer is inside the free training. No mention of price or product.

VIDEO #2

Registration Video (2min)

On the opt-in page. Previews what they'll learn. Creates anticipation. Same actor from the ad builds recognition and trust.

VIDEO #3

Confirmation Video (60s)

"You're in! Here's what to expect..." Primes them for the webinar and tells them exactly what to bring/prepare.

VIDEO #4

Replay VSL (60–90min)

AI actor hosts the webinar replay. Full content + pitch. Runs 24/7 as an automated funnel.

25–40%	8–15%	$497+	5–12x
Opt-In Rate	Webinar-to-Sale	Ideal Offer Price	Avg ROAS (Warm)

WHAT MAKES THIS FUNNEL WORK

1. **The registration video is the unsung hero.** Most people skip it. It should be your second-best copywriting effort after the webinar itself. A great reg video doubles show-up rates.
2. **Send reminder videos, not just emails.** Create 3 short (15–30s) AI actor reminder clips for Day-Before, Morning-Of, and 1-Hour-Before. Show-up rates jump 40–60% compared to email-only.
3. **Stack offers on the thank-you page.** After registration, immediately pitch a relevant $27–$47 tripwire. Funds your ad spend before the webinar even runs.

FUNNEL BLUEPRINT #3

The Retargeting Ascension Funnel

Turn the 95% who didn't buy into a second, third, and fourth revenue opportunity. Each touchpoint uses a different angle — same actor, new message — until you find the one that converts them.

f Facebook / Instagram

- Retarget page visitors at 1, 3, and 7 days with different AI actor angles
- Day 1: Overcome the #1 objection ("It's too complicated")
- Day 3: Social proof angle — customer results, testimonials
- Day 7: Urgency / scarcity — last chance, price goes up
- Exclude purchasers from all retargeting at every step

Y YouTube Pre-Roll

- 15-second non-skippable + 30-second skippable variants
- Target your own YouTube channel viewers + competitor keywords
- Same actor from sales page — creates subconscious familiarity
- CPA typically 40–60% lower than Facebook for warm audiences
- Best for high-ticket offers with longer consideration cycles

I Instagram Reels

- Vertical 9:16 format — Synthesys Actors supports this natively
- Hook must land in first 1.5 seconds (thumb-stop critical)
- Best for $27–$97 impulse offers and digital downloads
- Add captions — 85% of Reels watched with sound off
- Repurpose the same VSL as a 60-second Reels ad

E Email Video Sequence

- Host AI actor videos on YouTube (unlisted) and embed in emails
- 5-email sequence: Day 0, Day 1, Day 3, Day 5, Day 7 (urgency close)
- Each email = one specific objection overcome via video
- Subject lines that get opened: "Quick video for you..." converts 2x
- Video thumbnails with a play button always beat plain text
