How To Use This Swipe File With Synthesys Actors

1. **Pick your category** based on where your audience is in the awareness journey. Cold traffic = curiosity or pattern interrupt. Warm traffic = authority or aspiration.
2. **Select a hook** and adapt the bracketed placeholders to your specific offer, niche, and results. The more specific the number, the higher the conversion rate.
3. **Paste the hook as the very first line** of your Synthesys Actors script. The actor delivers it — that first line is what determines if anyone sees the rest.
4. **Test 3–5 hooks simultaneously** with a $5/day budget per hook. Promote the winner. The difference between a 3% CTR and a 0.3% CTR is almost always the first line.
